Invent your own brush.

Dots Brush.

Visual Concept

Target Users.

Those who need to discard immediately after writing to maintain security.

Those who want the brush of the painted picture to have movement.

Those who want to hide their meaning through a secret drawing.

Features.

1. You can draw a picture and make the dots of the picture move.
2. You can paint pictures that you can't see without UV light.
3. You can paint a picture that disappears over time.
4. You can choose the color, the time to disappear, the spread of the dots, the pen type, and the thickness.

Dots Brush. Algorithm.
